WHY DO YOU GET A 404?

Every response comes with a status code. Learn to read them.

404 = the server looked, but that page doesn't exist. The link is broken or the page was removed.

THE FAMILIES

Starts with	Means
1xx	Information
2xx	Success
3xx	Redirect (go somewhere else)
4xx	Client error: the request has a problem
5xx	Server error: the server has a problem

CODES YOU'LL MEET

Code	Meaning
200	OK
301 / 302	Moved (permanent / temporary)
401	Not logged in
403	Logged in, but not allowed
404	Not found
429	Too many requests, slow down
500	Server crashed
502 / 503	Server unreachable or overloaded

TRY IT YOURSELF

1. Visit any-site.com/this-page-does-not-exist
2. F12 → Network → reload → see the 404 status
3. If you build sites: make a friendly custom 404 page
