# HOW TO ORDER A VIDEO EDIT

The simple way I ask, and what Claude does each time. Copy this for your next video.

## WHAT I SEND

### 1 THE VOICE
The ElevenLabs mp3 for this video. One voice per video, always.

### 2 THE SCRIPT
The text I pasted into ElevenLabs, so scenes match the words.

### 3 THE STYLE
A reference video to copy, or a name like "Razorpay style".

## MY RULES FOR EVERY VIDEO

- **Synced:** scenes and text follow the voice, no lag.
- **Real logos and images** from the web, not plain mockups.
- **Orange "@oruim.tech" pill** at the bottom of every video.
- **Different edit style** for each new video.
- **Smooth text:** no shaky letter-by-letter or size-changing words.
- **Designed "Follow this channel" outro** at the end.
- **Comment-for-link ending:** "Comment ROADMAP", then I DM the link or PDF.

## WHAT CLAUDE DOES

### BEFORE
Asks which design and which voice, then waits for my yes.

### DURING
Builds every scene, checks for overlap and clipping, fixes errors.

### AFTER
Sends the video only when all scenes are clean.

# THE EASY ORDER OF WORK

- [x] Write the voice script as **one plain paragraph** (ready to paste in ElevenLabs).
- [x] Generate the voice, then **send the mp3** with the style.
- [x] Claude confirms: style, voice, script.
- [x] Claude builds, checks every scene, and sends the mp4.
- [x] I ask for fixes ("slow it down", "change this scene"), one video at a time.
- [x] Then covers, caption, hashtags and the comment reply.

# THINGS I ALSO ASK FOR

### COVERS
Two designs per video, in different styles.

### CAPTION + TAGS
Short caption, hashtags, pinned comment.

### GUIDE PDF
A free PDF for the website, one design each.

### STORY DESIGNS
Instagram story backgrounds and link images.

### SCRIPTS
Scripts for reference videos, voice sent after.

# COPY AND PASTE THIS

```
Edit my video. Voice: [attach mp3]. Script: [paste text]. Style: [reference video or style name]. Use real logos and images, orange @oruim.tech pill, synced text, Follow outro, comment keyword [WORD]. Confirm the plan first, check every scene, then send.
```

# QUICK CHECK BEFORE I SEND

- [x] Right voice for the right video
- [x] Nothing overlaps or gets cut off
- [x] Pill and outro are present
- [x] Comment keyword matches the PDF
