Om Raiwade

Web Developer & AI Engineer

Udgir, Maharashtra | raiwadeomrushikesh@gmail.com | omrushikeshraiwade.space | linkedin.com/in/om-raiwade | github.com/Raiwadeom

SUMMARY

I build software that solves real problems for real users, not portfolio pieces. My main project, DnyanSetu (dnyansetu.online), is the live student-services platform for my college: notes, papers, practice tests, scholarships, notices and a student Talent Corner in English and Marathi, installable with phone notifications. It brings together RaktSetu (blood-donor network) and CSM News Desk (press archive) under one account. I work mainly in React, Next.js, React Native, Supabase and Firebase, building daily with AI coding agents (Claude Code).

PROJECTS

DnyanSetu — College Student-Services Platform

dnyansetu.online | github.com/Raiwadeom/dyansetu

- Live portal for Chhatrapati Shivajiraje Mahavidyalaya, Udgir: unit-wise notes, previous-year question papers and scholarships with eligibility and deadlines, filtered by stream, semester and subject.
- Role-based accounts (student, faculty, staff, scholarship admin, main admin) with Google sign-in; faculty and staff go live only after admin approval, then upload notes and papers and post notices from their own studio.
- Tiered practice tests (Beginner → Intermediate → Advanced) that unlock a final exam; scoring runs in Vercel serverless routes so answer logic never ships to the browser.
- Installable PWA with Web Push alerts for notices, notes, scholarships and posts; per-page SEO and sitemap.
- Talent Corner: students share poems, shayari and creative work with likes, comments, follows and admin moderation.

Tech: React, Vite, JavaScript, Supabase (Auth, Postgres, Row-Level Security), Cloudinary, Web Push, Vercel Serverless

> **RaktSetu — Blood Donor Network** · *module of DnyanSetu | dnyansetu.online/raktsetu*
>
> - Connects patients who urgently need blood with verified student and staff volunteers in the same city; matches on real red-cell compatibility, so a request for A+ also reaches O-, O+ and A- donors.
> - Donors opt in with their existing account and get instant phone alerts on responses and closed requests.
> - Safety rules built in: adults only, 45 kg minimum, a health check at registration, an automatic 4-month rest after a donation, and clear no-payment guidance.
>
> *Tech: React, Supabase (Postgres, Row-Level Security), Web Push, Resend email alerts, Vercel Cron*

> **CSM News Desk — Press-Cutting Archive** · *part of DnyanSetu | csmnewsdesk.com*
>
> - Public, Pinterest-style archive of the college's newspaper cuttings; anyone can browse, open a cutting full-screen and download it without signing in.
> - Scans upload browser-to-Cloudinary through signed requests, so large images never pass through a serverless function; one set of components serves both public and admin views.
>
> *Tech: Next.js, Firebase Auth, Firestore, Cloudinary, Vercel*

EXPERIENCE

Technical Lead — Competitive Programming Club, Udgir, Maharashtra — *Sep 2025 – Apr 2026*

Administrative Assistant (Internship) — Shivaji Mahavidyalaya, Udgir · On-site — *May 2026 – Jul 2026*

ACHIEVEMENTS

- 1st Prize, Web Designing — TECHNOVA 2026, Chhatrapati Shivajiraje Mahavidyalaya, Udgir
- Selected among 20 participants — Hackathon 2026 (SRTMU Nanded); presented ARC-SAS, an AI-based career readiness and skills assessment system

EDUCATION

SRTM University, Nanded — B.Sc. Computer Science, SGPA 8.82 (First Year) — *Jun 2025 – May 2028*

Model English School — SSC (10th) — *Jun 2018 – Feb 2019*

CERTIFICATIONS

- Full Stack Web Development — Udemy (Issued Oct 2025)

SKILLS

Languages	TypeScript, JavaScript, Python, Dart, SQL
Web	Next.js, React, Node.js, Vite, HTML, CSS, PWA, Web Push
Mobile	React Native, Expo, EAS Build & Submit, Flutter
Backend & Data	Supabase (Postgres, Auth, RLS), Firebase (Firestore, Auth, FCM, Security Rules), MongoDB, REST APIs, Cloudinary
Tools	Git, GitHub, Vercel, Google Play Console, Google Search Console, Claude Code
