

Om Raiwade

Web Developer & AI Engineer

Udgir, Maharashtra | Raiwadeomrushikesh@gmail.com | omrushikeshraiwade.space | linkedin.com/in/om-raiwade | github.com/Raiwadeom

SUMMARY

I build software that solves real problems for real users, not portfolio pieces. My main project, DnyanSetu (dnyansetu.online), is the live student-services platform for my college: notes, question papers, practice tests and scholarships in English and Marathi. It now brings RaktSetu, a blood-donor network I first shipped as an Android app, and CSM News Desk, the college's public press archive, under one platform and one account. I work mainly in React, Next.js, React Native, Supabase and Firebase, with a growing focus on Generative AI and intelligent agents.

PROJECTS

DnyanSetu — College Student-Services Platform

dnyansetu.online | github.com/Raiwadeom/dnyansetu

- Live portal for Chhatrapati Shivajiraje Mahavidyalaya, Udgir: faculty-uploaded unit-wise notes, previous-year question papers and scholarships with eligibility and deadlines, sorted by branch, semester and subject.
- Tiered practice tests (Beginner → Intermediate → Advanced) that unlock a final exam; scoring runs in Vercel serverless routes so answer logic never ships to the browser.
- Bilingual English / Marathi interface with student and staff logins; one account opens every module below.

Tech: React, Vite, JavaScript, Supabase (Auth, Postgres, Row-Level Security), Cloudinary, Vercel Serverless

RaktSetu — Blood Donor Network · module of DnyanSetu | dnyansetu.online/raktsetu

- Connects patients who urgently need blood with verified student and staff volunteers in the same city; matches on real red-cell compatibility, so a request for A+ also reaches O-, O+ and A- donors.
- Moved from a standalone Android app into DnyanSetu so existing users opt in as donors with no separate install or sign-up; bilingual terms and eligibility consent at registration.
- Safety rules built in: adults only, 45 kg minimum weight, an automatic 4-month rest after a recorded donation, and clear no-payment guidance.

Tech: Supabase, Web Push, Resend · original app: React Native, Expo, TypeScript, Firebase, FCM, EAS Build

CSM News Desk — Press-Cutting Archive · part of DnyanSetu | csmnewsdesk.com

- Public, Pinterest-style archive of the college's newspaper cuttings, surfaced in DnyanSetu's announcements and services; anyone can browse, open a cutting full-screen and download it without signing in.
- Scans upload browser-to-Cloudinary through signed requests, so large images never pass through a serverless function; one set of components serves both public and admin views.

Tech: Next.js, Firebase Auth, Firestore, Cloudinary, Vercel

EXPERIENCE

Technical Lead — Competitive Programming Club, Udgir, Maharashtra Sep 2025 – Apr 2026

Administrative Assistant (Internship) — Shivaji Mahavidyalaya, Udgir · On-site May 2026 – Jul 2026

ACHIEVEMENTS

- 1st Prize, Web Designing — TECHNOVA2026, Chhatrapati Shivajiraje Mahavidyalaya, Udgir
- Selected among 20 participants — Hackathon 2026 (SRTMU Nanded); presented ARC-SAS, an AI-based career readiness and skills assessment system

EDUCATION

SRTM University, Nanded — B.Sc. Computer Science, SGPA8.82 (First Year) Jun 2025 – May 2028

Model English School — SSC (10th) Jun 2018 – Feb 2019

CERTIFICATIONS

- Full Stack Web Development — Udemy (Issued Oct 2025)

SKILLS

Languages	TypeScript, JavaScript, Python, Dart, SQL
Web	Next.js, React, Node.js, Vite, HTML, CSS
Mobile	React Native, Expo, EAS Build & Submit, Flutter
Backend & Data	Supabase (Postgres, Auth, RLS), Firebase (Firestore, Auth, FCM, Security Rules), MongoDB, REST APIs, Cloudinary
Tools	Git, GitHub, Vercel, Google Play Console
